Relationships and '23 Growth

Engage Your Curiosity

In many communities today there's a lack of curiosity, this is the great tragedy of a culture whose ancestors aligned the pyramids with the stars and developed the very letters and sounds we speak today. It seems as if the acceptance of moving ideas from one place to another without substance is the rule of the day.

Paragon A Global Initiative Corporation, from 2014 – 2022, is now Paragon, Global Initiative Foundation. The founder of Paragon GIF has served in both the public and private sector for over 20 years; targeting and cultivating its program models to educate and inspire youth and adults to careers in technology and cultural relations. First, opening a Certified, Illinois State Board of Education Vocational school in 2001, to train AV and continuing to now, developing and cultivating entrepreneurship, technology programs and travel abroad learning.

For some, it's the day-to-day issues we encounter that occupy us and cause momentary memory obstruction and results in the lack of continuity in concentration. For many others; the nature of curiosity has been buried, by those willing to discriminate or simply hold you back from life's true fundamentals of curiosity development.

"2022", has been an exciting year for Paragon GIF; advancing education, community relations and business partnerships. Launching Paragon GIF newest tech program "Genesis"; a youth program for ages 7–14 has allowed Paragon GIF to deliver tech training to youth, young adults and adults and grasp the complexities of when technology learning may have an impact on youth developing their life goals and how to achieve them.

Our youth are often curious by nature and willing to explore everything. The onus is on us to encourage our youth to ask questions, observe, explore and learn new things. The importance of reading, and have new hobbies. Learning at every age is important as an ingredient to embrace emotions and seek out challenges.

Partnership with community organization, and certified schools, has welcomed Paragon GIF to deliver its unique youth Genesis program to participating youth; 3D Printing, Drone, Robotics and Computer sewing. "Exposure and Participation" is Paragon GIF tagline. The excitement generated by these youth was exhilarating and left them wanting more.

Curiosity leads to a enjoyable way of approaching life. Inquisitive participation in a meeting or event of learning creates a greater experience to learn life's offerings. When we are more curious about life and interested in our effect on society it's easier to get involved, put in an effort and do well.

Paragon GIF, Preferred Vendors compliments our Foundations mission and avocations to deliver programs high tech applications and further develop potential Employer/Partners for internship employment.

Consulting Services

In January 2023 Paragon GIF will launch its website as a Foundation and further promote our philanthropic efforts to communities to exposes our "Exposer and Participation" programs. These programs will lead to travel abroad, local excursion and training scholarships to qualified candidates of any Paragon program.
